Money-Flow Narrative — What the Tape Is Saying

Phiên 2026-04-16: two-sided tape with clear rotation between winners and losers. Dẫn dắt là **Dầu khí** với net-flow -13.50M/ngày (trước đó -35.07M), Δ flow +21.58M. Áp lực phân phối mạnh nhất ở **Ngân hàng** (-22.08M/ngày, Δ -23.87M).

Thận trọng: Dầu khí, Bất động sản, Công nghệ có flow dương nhưng breadth yếu — khả năng là pump một-hai mã, không phải diffusion — chưa đủ tin cậy để 'mua gốc'.

Stealth radar: chưa sector nào đạt đủ 5 điều kiện §16.1 hôm nay — chờ tín hiệu trưởng thành, không fomo vào cảnh cao.

Trong bối cảnh HMM regime = **CHOP**, ưu tiên giảm gross exposure, chỉ cược vào stealth chất lượng.

Risk & Execution Notes

T+2.5 Settlement: mọi BUY hôm nay chỉ có thể bán từ phiên T+2; backtest Sharpe phải đã trừ 2.5d lag. **Fees:** hardcoded 15bps phí + 10bps thuế bán = ~40bps round-trip. **Price band:** HOSE ±7%, HNX ±10%, UPCoM ±15%; nếu basket chạm trần, skip fill ngày đó. **FOL:** các mã cận room ngoại (room < 3%) giảm trọng số foreign_net 0.5×. **ATR stops:** mặc định 1.8×ATR20 cho BUY, 2.5×ATR20 cho ACCUMULATE (wider). **Kill-switch:** nếu sector_risk_sentinel kích hoạt liên tiếp 3 lần trong phiên, đặt cờ config.trading_halt = true — dừng toàn bộ ACCUMULATE mới. **ETF rebalance mask:** zero-out foreign_net vào ngày HOSE/ETF review để tránh nhiễu. **Max concurrent:** 4 ACCUMULATE + 3 BUY + 0 short cash (short chỉ qua VN30F1M).

Next-Session Game Plan

- Regime = **CHOP**. Giảm gross, chỉ đánh stealth chất lượng.
- Chưa có stealth nào đủ điều kiện — giữ tiền mặt, chờ z20 crossover.
- Thoát / tránh: POW, MWG, TCB, VCB, ACB. Không bắt đáy cho đến khi breadth phục hồi.
- Kiểm tra kill-switch + T+2 lịch tiền về trước 09:00 sáng mai. Đứng full-margin khi regime = chop.
- Mở News & Catalyst section ngay đầu phiên, cross-check tin 48h trước khi đặt lệnh.
