

VN Market — Sector Money-Flow & Rotation Briefing (SecV3)

Daily expert-trader report • 2026-04-17 • Window 5d vs 10d • Regime-aware, news-enriched, stealth-scanned

CHOP

⚠ STALE SNAPSHOT — early-abort after 20/20 consecutive failures (vnstock probably down); capability_pass_count 0 < 50; sectors_missing_picks: ['STEEL', 'TECH']. BUY picks may be missing or unreliable.

Confidence 0.50 • Chop regime: no persistent edge, correlation elevated, reduce size, wait for a clean break of regime before new full entries. Stealth signals are most valuable here.

Stealth Accumulation Watchlist — Buy at the Root (gốc)

Sectors meeting Tom's early-entry doctrine (\$16.1): flow z20 > +1.0, foreign hit ≥ 60%, breadth rising, quiet ATR, price in bottom 40% of 60d range. These are the pre-breakout candidates.

Risk & Execution Notes

T+2.5 Settlement: mọi BUY hôm nay chỉ có thể bán từ phiên T+2; backtest Sharpe phải đã trừ 2.5d lag. **Fees:** hardcoded 15bps phí + 10bps thuế bán = ~40bps round-trip. **Price band:** HOSE ±7%, HNX ±10%, UPCoM ±15%; nếu basket chạm trần, skip fill ngày đó. **FOL:** các mã cận room ngoại (room < 3%) giảm trọng số foreign_net 0.5×. **ATR stops:** mặc định 1.8×ATR20 cho BUY, 2.5×ATR20 cho ACCUMULATE (wider). **Kill-switch:** nếu sector_risk_sentinel kích hoạt liên tiếp 3 lần trong phiên, đặt cờ config.trading_halt = true — dừng toàn bộ ACCUMULATE mới. **ETF rebalance mask:** zero-out foreign_net vào ngày HOSE/ETF review để tránh nhiễu. **Max concurrent:** 4 ACCUMULATE + 3 BUY + 0 short cash (short chỉ qua VN30F1M).

Next-Session Game Plan

- Regime = **CHOP**. Giảm gross, chỉ đánh stealth chất lượng.
- Chưa có stealth nào đủ điều kiện — giữ tiền mặt, chờ z20 crossover.
- Kiểm tra kill-switch + T+2 lịch tiền về trước 09:00 sáng mai. Dừng full-margin khi regime = chop.
- Mở News & Catalyst section ngay đầu phiên, cross-check tin 48h trước khi đặt lệnh.
